

### **Agenda Standing Points**

- There exists a strong alumni network in the start-up sphere, and there are alumni who have expressed interest to help startups that form in the campus. The proposal of a communication interface for this to happen with the help of SAIL is to be done.
- Subscription of famous online resources such as Harvard Business Review and Harvard Business Case studies in the online repository for student usage on the lines of that occurring in IIITH and IITB.
- To allow students to retake courses, in which they have been graded DD, irrespective of their CPI. That is to bring about flexibility in ordinance 9.5 in the academic ordinances.
- To propose an internship interface aimed at the second years, to facilitate the communication of internship opportunities that clubs and institute organizations receive to the second year students. There is a dedicated internship portal that functions in IIT Bombay for second years, it is high time to invest on such a feasibility in our campus.
