

Post contesting for: Girl Senator

Candidate's name: **Simran Barnwal**

AGENDA'S

1. Academic agenda :

- **Introduction of Department wise Undergraduate Research Award**

The goal of Undergraduate Research Award is to encourage research and development activities amongst the undergraduate students.

- **Hosting an online portal to make the application process to apply for the project easier both for the professor and the students.**

The professors would float their projects and the interest students would apply along with their CV, and the professor would select students according to their interest, enthusiasm and skills etc. In this way, the student Community has the information regarding the ongoing projects in the campus and the professor has a list of interest students.

- **24X7 access of Department CC for all students.**

It should be mandatory for all the department cc to be available to the students for educational purpose 24x7 irrespective of a student being a girl or a boy.

2. Maintenance agenda:

- **Renovation of Ladies washroom In academic complex.**

The ladies washroom has worn out. Many latches are broken, many basins which get clogged very easily. Flushes aren't working properly. In short, a total need of maintenance and renovation of ladies' washrooms.

- **Introduction of two different colored dustbins**

This would promote segregation and recycling of waste materials. The organic waste can be turned in compost which could be used as manure for plants across the campus, with the help of IITG green office.

- **Basic amenities**

Every washroom in the academic core and hostels should be provided with proper sanitation facilities like handwash, toilet paper etc.

3. Revision of swimming session timings for girls

The timings for girl gym and swimming sessions should be revised as per the ease of many girls who find the timings incompatible with their normal schedule.

Experiences (Credentials if any):

- Core Team Member of Team Technothlon'16.
- City Representative, Asansol (Technothlon)
